

Elect Chris Otten -- Mayor DC 2006

Public Hospital Now! The City must revitalize General Hospital or we must purchase and publicly manage Greater Southeast. Our focus should not be a privatized health scheme that leaves out the needs of our poorest residents.

No More Condos - Until impartial impact surveys are done by and for District residents we must halt the condoization of DC. Condoization helps to raise area rents, property costs, and taxes while simultaneously ushering in waves of gentrification. If there is new construction it must be on our schools, recreation centers, libraries, and other important social systems.

Empower our Advisory Neighborhood Commissions - ANC Commissions take the pulse of our neighborhood's needs on a daily basis and deserve more respect. ANC commissions must be funded at much higher levels, ANC commissioners shall be paid at least at a Part-Time level, and their decisions must have more binding control over the direction of our city.

These 3 major objectives will be met when you elect Chris Otten for Mayor of DC.
