

More Prisons – No Way!

Otten 4 Mayor

Why is it that the United States has more people locked up in cages than anywhere else on the planet? And why is it that the overwhelming majority of these prisoners are people of color?

The prison-industrial complex depends upon the oppressive systems of racism, classism, sexism, and homophobia. It includes human rights violations, the death penalty, industry and labor issues, policing, courts, media, community powerlessness, the imprisonment of political prisoners, and the elimination of dissent.

If you elect the Statehood-Green party then serious reforms will be made to the prison system right here in the District.

***Better trained police and real consequences for when they harass us. *Regular prison maintenance and cleaning would be required. *Healthy nutritional options for all prisoners. *Real-world job-training so that our prisoners have additional skills when they are back out.**
